

NETZON® HMS Series

HIT NETZON Libraries for long-term Archiving

Advantages of HIT Optical Storage are:

- Cost efficient and secure long-term archiving
- Green Storage with low CO² footprint
- Low Total Cost of Ownership (TCO)
- Advanced Standard Optical Media (BD)
- Seamless optical nearline/offline data storage

HIT NETZON® HMS Series

HIT NETZON® HMS libraries are especially designed for secure and cost efficient long-term archiving of critical digital data. The optical disc storage media can be used for nearline or offline storage.

All libraries are compatible to the HMS 35-slot re-movable magazines to load, unload the libraries or to keep the media offline, e.g. in an offline storage rack. All NETZON® HMS series libraries are equipped additionally with a mail slot for the import/export of single storage media. The reliable robotics guarantees a precise and rapid media changing for fast data access. The NETZON® Offline Rack HMS 8-OFF is capable of storing up to 3360 optical discs (430TB of data), stored in 96 HMS magazines and 12 intelligent drawers, equipped with RFID technology. A centralized database keeps the overview about every single disc stored in the 19" Rack.
